

# CLUB LAUNCH ASSISTANCE ROTA

## SUPERNOVA NATIONALS

As I'm sure you'll appreciate, getting a large fleet of boats on the water can be quite challenging for the shore team. So, this year, the Class Association would like members to help each other with launching on a rota basis, with each club having one designated day. All this means is, if it's your club's day, you help the shore team to get the rest of the fleet launched and the trolleys sorted before you launch yourself. No-one will miss any racing!

This only applies to launching, not recovery at the end. Boats coming off the water tend to be more spread out and therefore easier for the shore team to deal with.

The rota is based on your club, so please take note of which day is your club's turn to help.

We hope that, with a bit of goodwill all round, this will be a straightforward process.

Thank you,
